Background to the Case

Mr. Matthew Boyle may be involved in drug distribution in Portsmouth, particularly in the Southsea district, according to police intelligence that has been accumulating for some time. He played DJ at a Portsmouth club while he was attending university, and thereafter he kept close ties to the club and the pub, which is why he continued to perform there. His girlfriend, Samantha, who occasionally lives with him, does have an apartment in the Portsmouth area. She is a BSc student studying chemistry, while her brother Alexander studies computer science at Portsmouth University.

When the Manchester Crime Unit acquired trustworthy information about the arrest of a drug dealer named Anthony Dealer who had Mr. Matthew Boyle's phone number in his list of contacts, the Hampshire Drug Offenses Unit began to suspect Mr. Boyle. During the police questioning, Mr. Anthony Dealer acknowledged to them that Mr. Matthew Boyle is a close friend of his.

Following an unsolicited phone contact to Hampshire Crime Unit on Tuesday, October 29, reporting Mr. Matthew Boyle's behavior, the intelligence source suspected that he could be in possession of and/or producing child pornographic obscene information. On November 8, 2022, at 15:30, the Senior Investigating Officer, DCI Holmes, acquired a search warrant, promptly stormed Mr. Boyle's apartment and workplace, and then placed him under arrest in accordance with Sections 17, 18 and 19 of the Police and Criminal Evidence Act.

1.Streamlined Forensic Digital Evidence Report (SFR)

Relates to: Mr Matthew Boyle
Location: SOUTH SEA PORTSMOUTH flat 23
Ref No. : 2023120
Date of Offence: 8 November 2022
Crime No: 1
Examiner: Mitul Daiya
Report No:1

Case Management: The prosecution intends to rely on the forensic evidence in this SFR and, if there is a trial, to introduce it by way of an admission under Section 10 of the Criminal Justice Act of 1967 to the general effect that the listed exhibit(s) were forensically examined and the examination resulted in the described result(s). Therefore, the prosecution requests that the defense specify the problem if there is a genuine problem with the forensic evidence below that prevents the admission from being made (Crim.PR.3.3 and Crim.PR 33.3(2)). If there is expert testimony in this report, the defense is required to respond to it as soon as is practical, but no later than 14 days after the report is served. The response must state which, if any, of the conclusions in the report are admitted as fact and, in the event that one is not, what the disputed issues are with respect to that conclusion. This SFR is intended to enter any expert evidence contained therein as accepted fact, not as a witness statement covered by Section 9 of the Criminal Justice Act of 1967 and Criminal Procedure Rule 27 or as an expert report covered by Criminal Procedure Rule 33.4. If there is any expert opinion in this SFR, it is a summary of that opinion that was served in accordance with Crim. PR 33.3. (1). By ensuring that evidence is presented in the simplest and most understandable manner and by aiding the early identification of the key problems, SFRs help courts fulfill their obligation to manage the case (Crim.PR 3.1). (CrimPR, 3.0) Each party must cooperate fully with the court in carrying out its mandate (CrimPR 3.3).

1.1 Summary of the forensic evidence

1. IMG-20190531-WA0000.jpg	Brownie that appears to have drug powder on it
2. IMG_20190604_104820.jpg	The inside of the bowl contains drug powder.
3. Screenshot_20190604-112359.png	A snapshot of Mathew's WhatsApp conversation with his girlfriend, in which they discuss baking brownies and pizza which is their drug code
4. default_wallpaper.png	This picture contains some information that is concealed.
5. Deleted Content No.	We discover that Matthew deleted the Anth content number from his cell phone.
6. WhatsApp chat with Anth	They are conversing about pizza and brownies in this conversation. These brownies and pizza are signs of drug use.
7. Favorites.xlsx	We discover some drug prices in this dataset, however they were originally listed as food prices rather than drug pricing.
8. Places.docx	This file may be indicate where he is distribute its drug.
9. Web Search	There is some strange activity in his computer, such as information on how to create cocaine or meth, which is frequent in this server.

1.2 Technical Information

We will utilize autopsy 4.1.3 for computer investigation in this inquiry. In order for non-technical investigators to use digital forensics tools successfully, they should be simple and easy to use. In order to eliminate mistakes, autopsy aims to automate as much as possible. Wizards are used to assist the investigator know what the next step is, typical navigation strategies are used to help them discover their results. The features that comes with Autopsy out of the box plus those that are available from other parties makes it a final platform. Open source is autopsy. Cost-effective digital forensics solutions are crucial since budgets are getting smaller. Several of the modules offer:

- Advanced graphical event viewing interface for timeline analysis
- Hash Filtering - Ignore known good files and flag known problematic ones.
- Keyword Search -To identify files that reference pertinent phrases, use an index-based keyword search.
- Multimedia - Examine films and photos for EXIF data.

A strong mobile platform for reviewing and analysing forensic data is called XAMN 7.3.0 Viewer. We make it openly accessible to our customers as well as to authorized third parties, such court staff and digital forensics specialists, who may require access to evaluate such data. No installation or license is necessary; free. Filter material by time, text, date, deleted items, and other factors. With a thorough labeling capability, highlight your discoveries.

Details of the XAMN Software

1.3 Digital Evidence Supporting

1. The search for information of probative value to the inquiry will be in the area of to begin examination of the gathered material, first, in the XAMN tool, we discover a brownie picture that appears to have drug powder on it and was sent by Samantha on 31/05/2019 at 21:13, Mathew’s girlfriend. Second, we discover three possible encrypted files in the autopsy: travel.doc, places.docx, and favorites.xlsx. I use the PRTK tool kit to crack the password. After discovering the password, we discover some information about medicine costs and they provide the name of the food inset of the drug name. In the picture below, we can observe that.

Fig. Drug Acronyms

2. After looking through other files on my phone, I saw a dish of powder that may contain drugs and may be distributed at bars and clubs, upon further investigation, we discover that the location of this image is an elementary school.

Fig. Dish of drug

In addition, I find that this image was taken on 04/06/2019 at 9am.

3. To check the phone I catch Samantha and Mathew talking about pizza and brownies, which indicates that they are consuming drugs and distributing them to bars and clubs nearby. I also discover that Mathew distributes drugs in Manchester following conversations I monitor between Anthony and Mathew on WhatsApp.

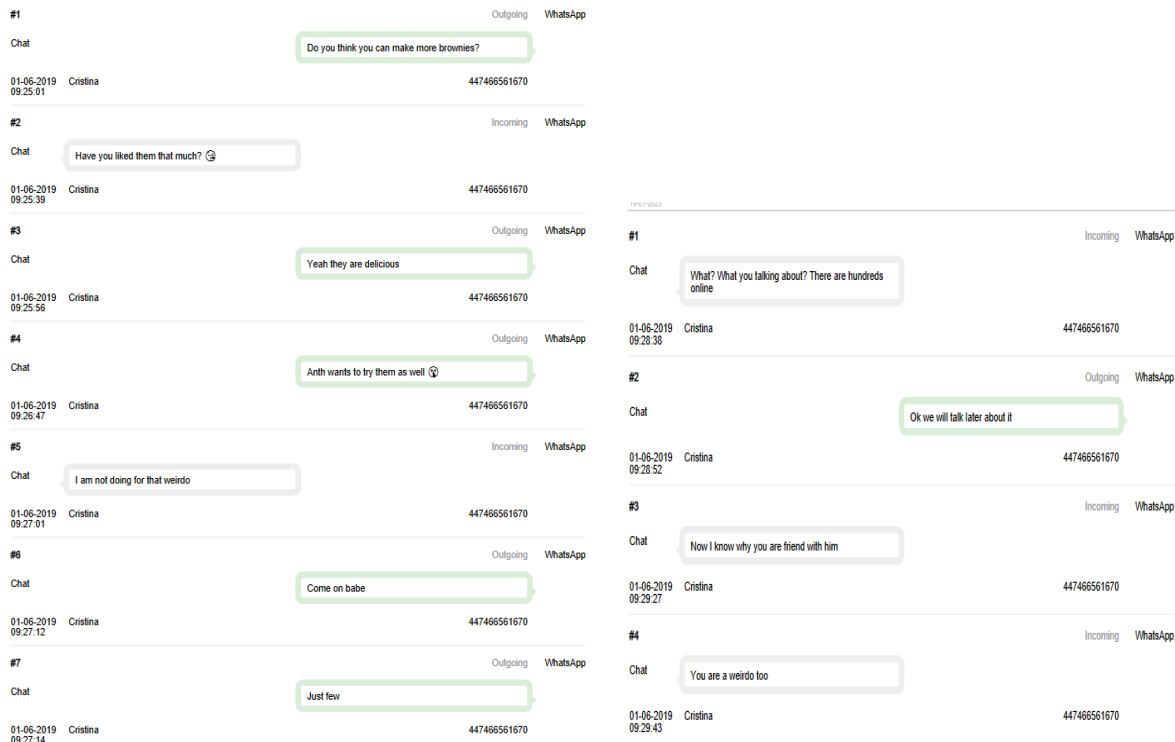

Fig Sam and Math

I overhear Anthony and Matthew discussing doing business from it in their talk.

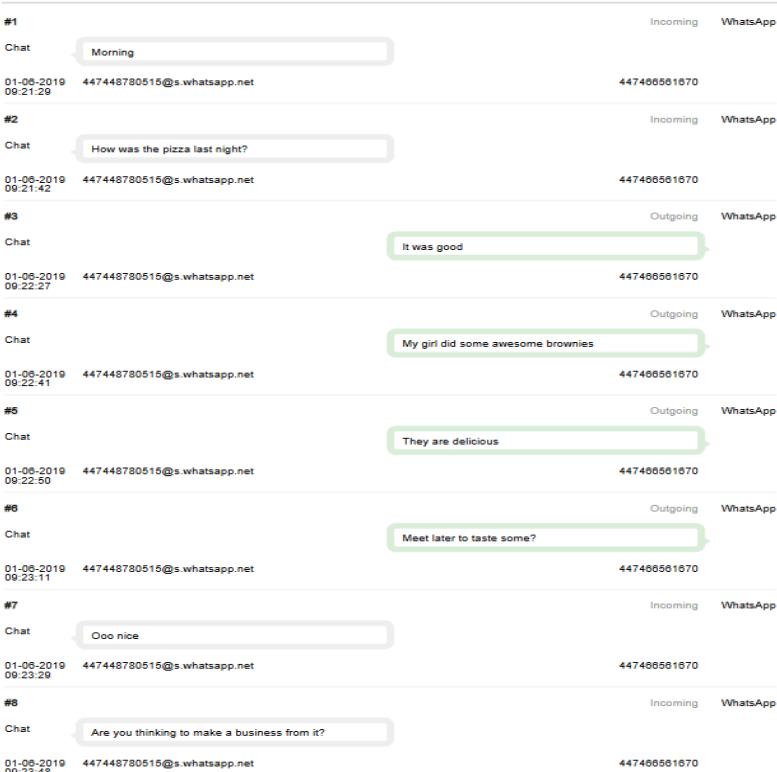

Fig Anth and Math

4. According to his phone location, he left for Manchester on July 6, 2019, around 10 p.m., and returned to Portsmouth the following day. As a result, we may infer that he visited Manchester frequently. A computer travel file that contained information regarding the expense of getting from Portsmouth to Manchester was also discovered, that may be he also distribute drug in Manchester club or bar.

4. Summary

Mr. Matthew Boyle is a drug distributor who carries out all of his drug-related crimes and child pornography while facing opposition, as we can see. In the favoirit.xmlx file, we can also locate the drug's pricing according to name. In my view, the capital letter indicates a type of drug, such as cocaine, meth, etc.. Additionally, we discover that Anthony was involved in the crime after seeing Mathew's WhatsApp conversations; as a result, the police has already detained Anthony and is pushing for additional inquiry.

After viewing the conversation between Samantha and Matthew, it is clear that she is also involved in this crime, necessitating additional investigation and punishment in accordance with the crime's categorization.

Matthew is involved in that crime as well, according to that as well as the fact that he gave him some penalty, as we discovered some pornographic photographs on his computer.

 HM 5-01 : 3 Phones, SIM cards,
 MP-220 : GPS Tracker
 ADO99 : ADAPTER
 HD 099 : Hard drive
 MP 239 : mobile Phone.

The Acquisition, I entered the room around 2:35 pm on 9th November. The first thing I saw at the crime scene was a paper book, something like user manual of the "TRACEUR GPS-GSM" device. Then just side to it I found a plastic bag full of mobile phones and accessories, SIM cards. Next thing I found was a device from the "Tantoni" company with adaptor and a mobile phone. As the computer next to that was in sleep mode. But for identification of OS I clicked on the mouse and found the Ubuntu OS was installed. Another side of the computer has a bag with some wires. The main and a major thing was a hard-drive with an adaptor and wire to connect it with computer.
